- Languages: JavaScript, HTML5, CSS3
 - Frameworks & Libraries: React.js, Next.js, Node.js (basic), Express.js
 - Styling: Tailwind CSS
 - Authentication & Security: Single Sign-On (SSO), OAuth
 - Databases: MongoDB (familiar), MySQL (basic)
 - Tools: Git, GitHub, Postman, NPM
 - Other: REST APIs, Responsive Design, Adobe Journey Optimizer
-

WORK EXPERIENCE

Custom Software Developer – Accenture

FEB 2023 – PRESENT

- Led frontend development of an AI-powered agent application deployed across Web and Microsoft Teams platforms
 - Implemented Single Sign-On (SSO) using OAuth-based authentication, enabling secure and seamless cross-platform access
 - Built scalable and high-performance UI components using React.js and Next.js
 - Integrated frontend components with backend APIs to support real-time AI-driven interactions
 - Collaborated with cross-functional teams (backend, product, QA) to ensure smooth delivery and system compatibility
 - Focused on performance optimization, usability, and enterprise-grade security standards
 - Marketing Automation – Adobe Journey Optimizer
 - Created and managed customer audiences based on business requirements
 - Designed and executed customer journeys for targeted marketing campaigns
 - Worked with real-time data triggers and segmentation logic
 - Contributed to campaign optimization and improved engagement workflows
-

PROJECT EXPERIENCE

Easy Learn App – Next.js

- Developed a structured learning platform with chapter-wise content organization
 - Implemented quiz functionality, result tracking, leaderboard, and review system
 - Handled frontend development including routing, API integration, and UI state management
 - Ensured responsive design and smooth user experience across devices
-
